

<u>Test Types</u>	<u>Cost</u>	<u>Times</u>	<u>Skills Assessed</u>
Cognitive Testing	\$225 total	Approximately 90 mins of testing, and a 60 min consultation	comprehension-knowledge fluid reasoning long-term memory visual processing auditory processing processing speed short-term working memory
Cognitive Testing with Achievement Testing *recommended*	\$300 total	When paired with the Basic Test , 3 hours of testing (with breaks) and a 60-90 min consultation	comprehension-knowledge fluid reasoning long-term memory visual processing auditory processing processing speed short-term working memory

The above subtests measure the general intelligence (IQ), or underlying cognitive skills students use while learning. The information that you will receive from these tests will help you better understand how to help your child learn. The Tests of Cognitive Abilities gives you a clear picture of how your child's brain interacts with new information. When both the achievement and cognitive abilities tests are administered, you can see how cognitive strengths and weaknesses are impacting school achievement. Please contact **Serena Manning, M.Ed.** with any questions you may have. She may be reached at info@lighthouseEDU.net

Please note Cognitive testing is not offered in April and May during our busy season.
